Release Notes for CounterPath Bria 2.5.4

for Microsoft Windows®

June 26, 2009

New Features

- Bria now includes G.722 audio codec.
- The microphone icon at the bottom of the softphone is now a control that lets you control the audio going into Bria.
- The right-click menu on the system tray now includes a menu item to hang up a call.
- The behavior of the IM alert has changed.
 - Previously, if you were in a conversation with another party, an IM alert would appear only when the other party first contacted you.
 - Now, the IM alert appears when the party first contacts you. It also appears during the conversation if the IM window is not in focus.
- As of version 2.5.4, the language versions of Bria 2.5 are now available. The supported languages are French, German, Italian, Spanish, and Brazilian Portuguese.

Known Issues

Codec Seletion

Currently, the client does not select the best codec based on the available bandwidth and network conditions. When making an offer, it will offer all enabled codecs. When accepting an offer, it will accept the first supported codec from the offered list.

Target Domain Routing

On the Advanced tab in the SIP Accounts dialog, there is a field that lets you turn on target domain routing. When this feature is enabled, requests with a complete URI (user@ABC.com) go to ABC.com.

In order to enable this feature you must check the field on the Advanced tab and also choose “Domain” in the “Send outbound via” field on the Account tab. (If this field is set to “Proxy” the field on the Advanced tab is ignored, regardless of whether it is checked or not).

Microsoft Windows Vista or Windows XP Guest Accounts

You cannot use Bria on Windows Vista® or Windows® XP using the restricted “Guest” Windows account.

Third-party Software Notices

AES

This product includes software copyright (C) Mok-Kong Shen 2003. mok-kong.shen@t-online.de.

Free license:

This work and all modified versions of it may be freely copied, modified, redistributed and used for all legal civilian purposes without formality albeit at licensee's own risk and responsibility, subject to the following conditions:

- (1) A copy of this copyright notice with the release history list and the site modification history list must be included in any copy of this work or any modified version of it.
- (2) If this work or any modified version of it forms part of a software in object code or binary code, a document for users should accompany the software stating this fact and include this copyright notice as well as an URL of the licensee where the source code of the package in the version actually being used in the software can be found.
- (3) Any modification (except dropping of the Supplement) should be appropriately documented in the site modification history list below. The last date of site modification (at the beginning of the package) is to be updated.
- (4) In case of non-trivial modifications, i.e. those stemming from efficiency or correctness considerations or from issues of interoperability with other AES implementations, a copy of the modified package is to be immediately sent to the copyright owner at the address above.
- (5) Eventual negative or unfavourable consequences and losses or damages of any form to any persons in connection with the use of this work or its modified versions do not constitute any liabilities on the part of the copyright owner.

This free license is unlimited in time [1]. Any attempt of non-compliance with the above terms or any occurrence of their practical unsatisfiability due to whatever reasons, however, automatically terminates the license. Such termination does not affect other licensees who have previously obtained materials from the person with the terminated license but who continue to comply with the above terms.

Other licenses:

Any usages of the contents of the package that don't qualify for a free license as stated in the above require explicit specific licenses from the copyright owner.

[1] Since copyright grants could be revoked after 35 years (see <http://www.copyright.gov/title17/92chap2.html#203>), it could be argued that this license is not timeless for sure. On the other hand, the lifespan of AES itself isn't likely to exceed that period. So the issue is not practically relevant in our context.
